

Wallpanels

WHO WE ARE

The Fibo story

Fibo has manufactured waterproof wall systems in Lyngdal, Norway since 1952. Today Fibo is a market leader across Scandinavia and the United Kingdom, with panels installed in homes, hotels, healthcare, and multifamily housing worldwide.

WHAT FIBO IS

Fibo is a 100% waterproof wall panel system for showers, bathrooms, kitchens, and other demanding rooms. Each panel is built from a seven-layer marine-grade plywood core with a high-pressure decorative laminate front that serves as the waterproof membrane at the face of the wall.

HOW IT GOES TOGETHER

Panels click together and lock with Fibo's Aqualock system, then the seams are sealed with Fibo Seal. The result is a continuous, grout-free surface with no separate membrane or backer board behind it. Fibo mounts directly over studs with OSB, existing tile, wood, or drywall.

WHY FIBO

Save time. Save the hassle. Save money.

Fibo removes the slowest, most failure-prone steps in a traditional tiled wall. Less labor, fewer trades, and no grout to fail later.

No demo required

Install over existing tile in many retrofits.
Skip the tear-out and the dumpster.

No RedGuard. No grout.

No separate waterproofing membrane and no grout lines to seal, which removes drying time and future maintenance.

Up in 2 to 3 hours

A typical tub or shower surround goes up in about two to three hours.

A one or two person crew

Lightweight panels are handled without a full tile trade, so labor stays lean.

Installs over almost anything

Studs with OSB, existing tile, wood, or drywall.

Tile and non-tile looks

Choose clean non-tile surfaces or CNC-milled tile designs.

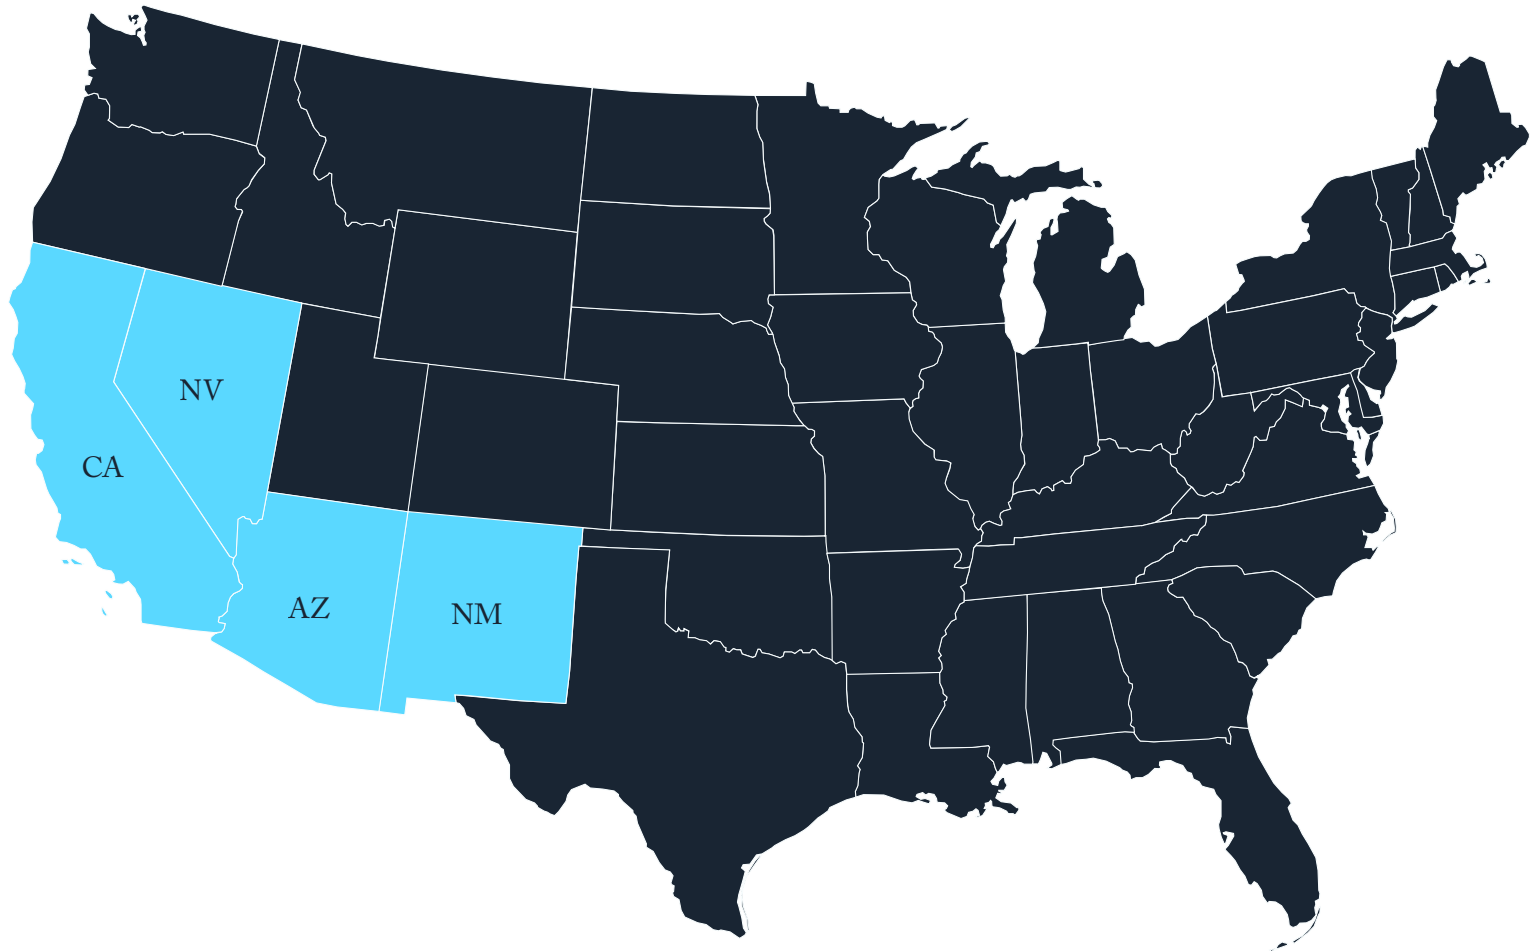

WHY NOW

Fineline is expanding Fibo across the Southwest. Be the first in your area to carry the system. Early partners receive territory exclusivity and price protection. Fibo is not sold on retail shelves.

Arizona.
Nevada.
New Mexico.
California.

Southwest Territory

Fineline is Fibo's distribution partner across the Southwest. If you build or specify in these states, you can source Fibo directly, with no retail middle layer.

Arizona

Distributors, GCs, & design firms across the state.

Nevada, New Mexico

Coverage for commercial and multifamily projects.

California

From modular plants to hospitality and healthcare.

Early partners lock in territory exclusivity and price protection. Be the first in your area to carry Fibo.

Everything a specifier or installer needs to know, in one view.

- Easy and quick to install**
 Up to five times faster than a tiled wall.
- No backer required**
 No drywall, cement board, or separate waterproofing membrane.
- Grout-free surface**
 Nothing to seal and nothing to fail over time.
- GREENGUARD Gold certified**
 Low chemical emissions for healthier indoor air.
- Antibacterial surface**
 Inhibits common bacteria, including E. coli and Staph aureus.
- Warranty you can specify**
 Limited lifetime residential. Limited 25-year commercial.

Made for modular

Up to 45% lower carbon footprint than tile, per an independent life-cycle assessment.

Fibo installed across real bathrooms, showers, and feature walls. Every surface below is grout-free.

Black Marble

Bianco Marble

Denver White

From bright marbles to warm woods and matte concrete, Fibo covers the full range of American interiors.

Bright Marble • hospitality bath

Cracked Cement • multifamily shower

Light Wood • dry feature wall

Light Sand • powder room

Panel size 48 in × 94 in

Non-tile

Grout-free

A soft white marble with cool gray veining. The full 48-inch panel reads as one continuous slab, with no grout lines to break the stone. A clean, bright backdrop for baths, showers, and feature walls.

Panel size 48 in × 94 in

Non-tile

Grout-free

A luminous white marble with subtle movement, drawing on the classic look of Italian Carrara. Its reflective surface opens up smaller rooms and pairs easily with both warm and cool fixtures.

Panel size 48 in × 94 in

Non-tile

Grout-free

A matte concrete look with natural tonal variation. Understated and industrial, it suits modern multifamily, hospitality, and commercial interiors where a tiled surface would read as busy.

Panel size 48 in × 94 in

Non-tile

Grout-free

A dramatic black marble with bright veining. High contrast and high impact, ideal for feature walls and upscale bath and shower surrounds.

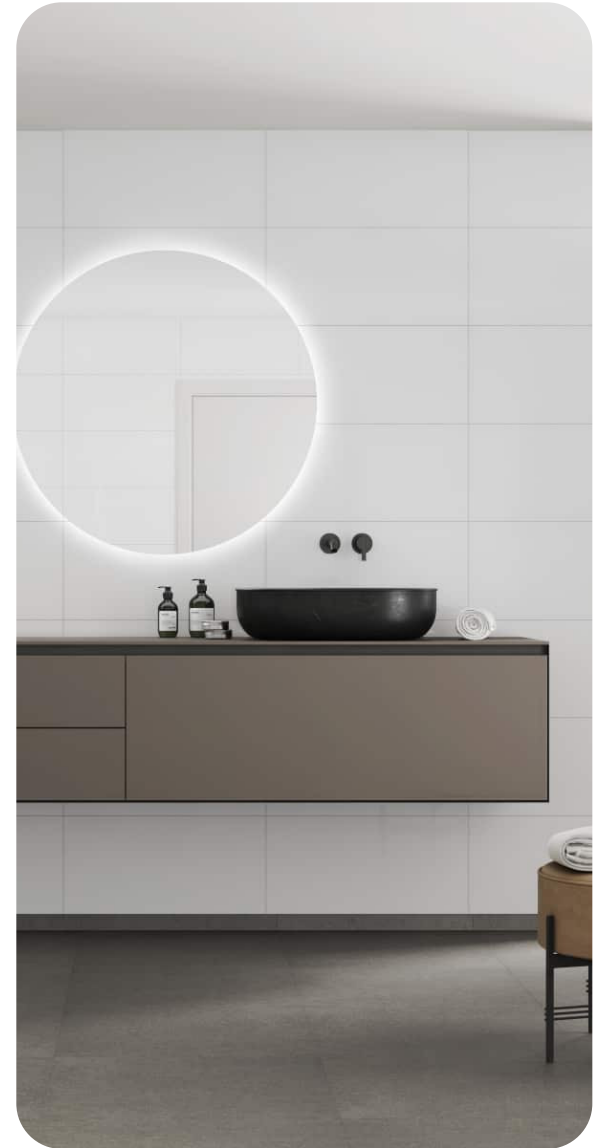

Denver White

Subway

Elongated hexagon

24 × 12

Panel size 24 in × 94 in

Tile

Grout-free

A classic white tile look milled directly into the panel, so the pattern is part of the surface rather than a grid of grout. Denver White comes in three CNC-milled layouts: subway, elongated hexagon, and 24 by 12. All the rhythm of tile with nothing to seal, stain, or scrub.

Panel size 24 in × 94 in

Tile · Slatwall

Grout-free

A warm wood-grain slatwall look that adds vertical texture and rhythm to dry and semi-dry spaces. A durable, low-maintenance alternative to real wood cladding, with the same grout-free, waterproof build as the rest of the range.

Panel size 24 in × 94 in

Tile · 24 × 12

Grout-free

A soft, sandy neutral in a 24 by 12 tile format milled into the panel. Warm and versatile for baths, powder rooms, and light commercial interiors that want texture without a heavy grout grid.

Profiles

Profiles form the framework of every Fibo installation and give each edge a clean, finished line.

Base Profile

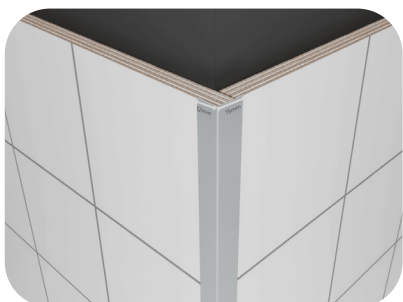

Sets the level starting line at the base of the wall.

☐ White ☒ Aluminum

Hidden Internal Corner

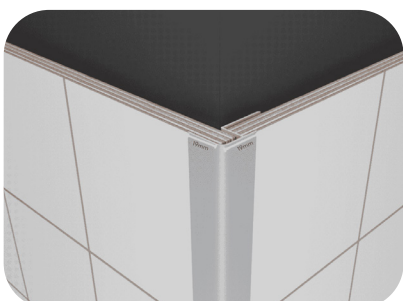

Creates a clean, concealed inside corner with no visible trim.

L Profile

Finishes exposed panel edges with a crisp, straight return.

☒ Black ☐ White ☐ Silver

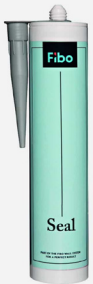

External Corner Profile

Wraps outside corners with a durable, finished trim.

☐ White ☒ Black ☐ Silver

The sealing, cleaning, and fastening kit that makes every installation watertight.
